

# Nuvico 5MP IP Camera Firmware Update

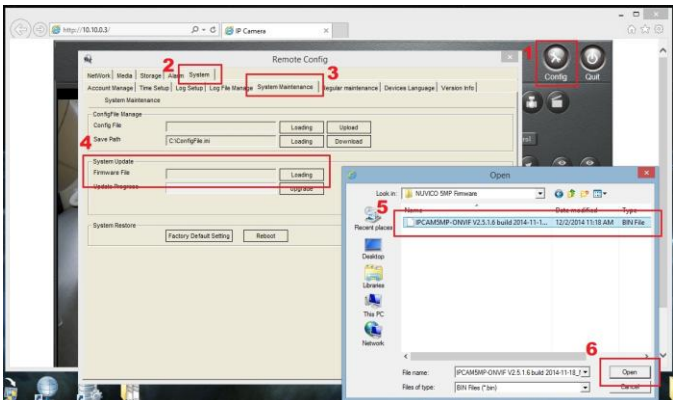

## Camera Login

1. Using Internet Explorer, type in the IP camera's address.  
For example, `http://x.x.x.x`.  
The IP address can be detected and assigned using the `IPCameraManager`.
2. Login: Username: admin  
Password: admin

## Changing Resolution

1. Press Config
  2. Media Tab
  3. Video Encoder
  4. Under Main Stream, select desired resolution: *5MP*, *3MP*, *2MP (1080p)*, *1.3MP (720pp)*
- Then hit save. **To update, change the camera resolution to 2MP (1080P).**

## Updating F/W for 5MP IP Cameras

1. Hit Config
  2. System Tab
  3. System Maintenance Tab
  4. Under System Update, Press Loading
  5. Select the appropriate 5MP F/W version
  6. Open
- Hit Update - Camera will update and reboot.

Once the update is complete, the camera can then be changed back to 5MP.
