2 Package

3 Overview

• Front Panel

1	Micro SD card slot	5	Audio input
2	Reset	6	Audio output
3	HD-TVI/AHD video input	7	Power indicator
4	Grounding	8	DC12V power output

• Rear Panel

1	DC12V power input	4	Alarm output
2	PoE network interface	5	Alarm input
3	Analog video output	6	RS 485 interface

4 Network Connection

Here we take accessing the device via LAN for example. In LAN, there are two ways to access. 1. Access through Xcel IP Utility;

2. Directly Access through the web browser

The default network settings are as shown below:

IP address: 192.168.226.201 HTTP:80
Subnet Mask: 255.255.255.0 Data Port:9008
Gateway: 192.168.226.1

You may use the above default settings when you log in the device for the first time.

- Access through Xcel IP Utility

- ① Make sure that the device and the PC are well connected via LAN.
- ② Find the Xcel IP Utility on the CD and then install it in the computer. After that, run the Xcel IP Utility as shown below.

- ③ Modify the IP address. The default IP address of this device is 192.168.226.201. Click the information of the device listed in the above table to show the network information on the right hand.

Modify the IP address and gateway of the device and make sure the network address is in the same local network segment as the computer. Please modify the IP address of your device according to the practical situation.

For example, the IP address of your computer is 192.168.1.4. So the IP address of the device shall be changed to 192.168.1.X. After modification, please input the password of the administrator and click “Modify” button to modify the setting.

The default password of the administrator is “123456”.

- ④ Double-click the IP address and then the system will pop up the browser to connect the IP Camera. Download the Active X control and run it in the computer. Then input the user name and password in the login interface.

Name : admin

Password :

Stream Type : 1920x1080 25fps

Language : English

☐ Remember me

Login

The default username is **admin**; the default password is **123456**.

- Directly Access Through Web Browse

- ① Make sure that the device and the PC are well connected via LAN.
- ② Find Xcel IP Utility on the CD and then install it in the computer. After that, run Xcel IP Utility.
- ③ Modify the IP address and make sure its network address is in the same local network segment as that of the computer.
- ④ Open the web browser and input the modified IP address in the address bar to log in the web browser client. If it is the first time for you to log in, you should download the Active X control and run it in the computer. After that, input the default user name and password to login.
